## Icom's M510: Command and Control on the Water

**KIRKLAND, Wash. (June 2021)** – The newest member of Icom's all-star lineup of marine products is the M510, a Class-D DSC VHF marine transceiver with wireless capabilities. You can command and control the M510 from your smart device using the RS-M500 app.

The M510 fixed-mount marine transceiver is a powerhouse tough enough for the commercial market yet refined for the recreational boater. With the ability to receive AIS signals (AIS version only), you can see surrounding vessel traffic in real-time and directly make individual DSC calls to selected targets. At nearly half the depth of the M506, installation location options are wide open. The 3.5" color TFT LCD provides a wide viewing angle and high-resolution characters and icons for supreme readability, even in low light with night mode. Front and back connection ports allow an additional wired station using a COMMANDMIC™.

With the optional CT-M500 interface box, gain NMEA2000™ connectivity and a two-way hailer/foghorn function. The CT-M500 connects to your M510 wirelessly, keeping installation flexible. Other features include loud and clear audio, Simplified Navigation Function, Active Noise Cancelling, IP68 waterproof rating, Icom's own AquaQuake™, and much more.

With the accompanying RS-M500 app (available for iOS® and Android™), use your phone as a receiver and control the M510 through its built-in WLAN transmitter. With access points you can extend the range of the M510's connection throughout the vessel. Up to three smart devices can be programmed into your onboard system.

AIR. LAND. SEA.

This tech-filled VHF fixed mount is filled with modern features to help you stay in contact and navigate the open seas with ease. Icom is known worldwide for manufacturing the most impressive marine radios – handheld or fixed mount. And in a world where technology is ever-evolving, Icom continues to stand the test of time with leading-edge forward-thinking. Because of this, boaters the world over choose Icom for their legendary durability, quality, dependability, and ease of use. To learn more, watch the M510 Introduction [here](#).

Contact your favorite Icom [dealer](#) today and ask about the M510. And be sure to check out our entire lineup of quality Marine radios [online](#). Make sure to Follow Us on [Twitter](#) or Like Us on [Facebook](#) for show information.

## BRING IT ON.

### About Icom America

Icom Incorporated is a wireless communications equipment manufacturing company located in Osaka, Japan. Since Icom's establishment in 1954, Icom has had a long record as a trusted manufacturer of land mobile radios, marine radios, navigation products, aviation radios, communications receivers, and amateur radios. Icom is recognized as a reliable two-way radio global brand name worldwide with a reputation for rugged, high-quality products. Icom radios are used by many professional organizations worldwide, including military/police forces, local governments, utilities, transportation/airports, security firms, and many other users. Icom is taking this deep knowledge of radio technology and expanding to a new genre of professional radio in the satellite communication field.
